# AUTHENTIC PRINTING CERTIFICATE

This is an artistic photographic print, or rather a valuable object that is appreciated not only for the aesthetic data of the photographed subject, but also for the physical characteristics of the support chosen for the print and the way in which they contribute to the materialization of the photographic idea.

Fine Art inkjet technology has been used, which allows to achieve extraordinary results in terms of color quality, resolution and durability, thanks to the latest generation of Epson printers and new HDR inks on 100% cotton fiber papers.

To print this photograph you simply did not click a button. Behind each of these prints the craftsmen have spent time, care and passion in respecting the processes and time needed to achieve the best possible result using the best high definition equipment and the finest materials.

Please handle these artistic artifacts with care, being very delicate to scratches and PH variations (even just the grease of the leather can leave haloes). Please also never roll up the print, as this could ruin the printed surface.

Thank you for choosing OEG, printing on paper is the only way to give photography a true dignity.
